Spot Forecast for LINDSEY LAKE TANKER SPILL - I-84 AT MP 54...OREGON
DEQ/USEPA
National Weather Service Portland OR
235 PM PST Sun Feb 17 2019

Forecast is based on forecast start time of 1600 PST on February 17.
If conditions become unrepresentative...contact the National Weather
Service Portland, Oregon office.

.DISCUSSION...

Temperatures will remain below normal for February through much of the upcoming week, as the Pacific Northwest remains under the influence of north-northwesterly flow from Canada and the Gulf of Alaska. The latest surge of cold air is spreading southward from the Okanagan and into the Columbia Basin; the leading edge of this cold air will arrive at the spill site with a switch to easterly winds early Monday morning. Low clouds will likely bank up against the east slopes of the Cascades Monday, with a few flurries possible through the day. More significant precipitation is expected to develop Tuesday with showers likely to linger into Wednesday. At this time it appears precipitation will begin as a brief period of snow before changing to rain at river level Tuesday afternoon or evening.

.REST OF TODAY...

Sky/weather.....Partly sunny.
Chance of pcpn.....5 percent.
Max temperature.....42-45.

Min humidity.....60-65 percent.
Dewpoint.....30-34.
Surface winds.....West winds 3 to 7 mph. Gusts up to 20 mph.
Visibility.....Greater than 6 miles.

Sky/weather.....Partly cloudy during the evening, then
increasing clouds. A few flurries possible
after midnight. Patchy fog or freezing fog
after midnight.

Sky/weather.....Mostly cloudy. Occasional flurries or light snow. Little or no snow accumulation.

after midnight.

.THURSDAY...Partly sunny with a 20 percent chance of rain and snow showers. Highs around 40. Northeast wind 3 to 6 mph.

.THURSDAY NIGHT...Partly cloudy. Lows around 25. East wind 2 to 5 mph.

.FRIDAY...Partly cloudy with a 20 percent chance of snow. Highs 35 to 40. East wind 5 to 10 mph.
